Docket No. 18433.00  
Re: Provisional Patent Application for  
VIBRATING BODY PIERCING JEWELRY

Dear Messrs. Andrews and Whittinghill:

Enclosed is a finalized copy of the provisional patent application which has been prepared in connection with the above invention.

Please carefully review the enclosures to confirm the accuracy of all information, disclosures and statement. Please note that revisions to your application could result in increased time and costs due to the additional work involved. The formal documents have been prepared indicating that two inventors (Mr. John Troy Andrews and Mr. Kenneth Richard Whittinghill) are involved with the present invention. (Please note that the order in which the co-inventors are listed and who share equally in the invention has no bearing upon the rights of each to the invention.)

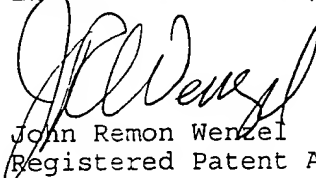

If all is in order, sign and date the formal document in the places indicated, exactly as your printed name appears, prior to returning all papers (the specification, drawings and the formal document) to this office. Upon receipt of the application and executed formal document, we will promptly prepare such for filing with the U.S. Patent and Trademark Office and provide you with a date-stamped copy to verify the filing date for your records.

Please note that as this is a provisional patent application, it will automatically become abandoned one year after the filing date. You must file a utility or international patent application based on your provisional patent application, within one year after the filing date of your provisional patent application, in order to maintain patent pending status and pursue patent protection for your invention.

If you have any questions, please feel free to give us a call at your convenience. For now, it has been a pleasure serving you.

Very truly yours,
